Dr. Joshua Lederberg
Department of Genetics
University of Wisconsin
Madison 6, Wisconsin

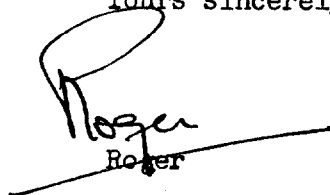

Dear Joshua,

We sent off the requested parahydroxybenzoic acid and mandelic acid the other day. I hope that it arrives safely.

I am sorry now that I wrote about the possibility of visiting Madison, because when I actually got around to figuring out my travel schedule it appeared that I couldn't possibly fit it in to the time allotted. Our new course on advanced microbiology is taking a tremendous amount of our time and I have to get back to Berkeley, if possible, on Sunday evening in order to be sure that everything is going to go according to Hoyle for the following week. So I am afraid that I'll have to beg off on this.

With best wishes,

Yours sincerely,

Roger
